By Ken Thompson

In his powerful and provocative book, *Dead Serious Wild Hope Amid The Sixth Extinction*, Ken Thompson explores the urgent crisis of the sixth extinction and offers a roadmap for hope and action.

The sixth extinction is the largest mass extinction event since the dinosaurs went extinct 66 million years ago. It is estimated that we are losing species at a rate of 100 to 1,000 times faster than the natural background rate of extinction.

The causes of the sixth extinction are complex, but they include habitat loss, climate change, pollution, and overexploitation. These factors are all

driven by human activity, and they are having a devastating impact on the planet's biodiversity.

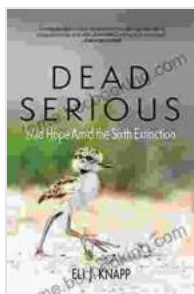

The loss of biodiversity is a serious threat to human well-being. Biodiversity provides us with food, clean water, air, and medicines. It also helps to regulate the climate and protect us from natural disasters.

The good news is that it is not too late to act. We can still save many species from extinction and mitigate the impacts of the sixth extinction. Thompson offers a roadmap for hope and action that includes:

- Reducing our greenhouse gas emissions
- Protecting and restoring natural habitats
- Reducing pollution
- Ending overexploitation
- Educating ourselves and others about the importance of biodiversity

Dead Serious Wild Hope Amid The Sixth Extinction is a powerful and inspiring book that offers a roadmap for hope and action. It is a must-read for anyone who is concerned about the future of the planet.
