Choosing the Right Crochet Hook

The size of the crochet hook you choose will depend on the weight of the yarn you are using. A general rule of thumb is to use a hook that is one size smaller than the recommended hook size for the yarn. This will help to create a tighter stitch and a more durable blanket.

Getting Started

Once you have chosen your yarn and hook, you're ready to get started! The first step is to make a slip knot. To do this, make a loop with the yarn and place it on the hook. Then, insert the hook into the loop and pull the yarn through to create a knot.

The next step is to chain. To chain, simply insert the hook into the loop on the hook and pull the yarn through to create a new loop. Repeat this process until you have reached the desired length.

Once you have chained, you're ready to start crocheting. The most basic crochet stitch is the single crochet stitch. To do a single crochet stitch, insert the hook into the second chain from the hook and pull the yarn

through to create a loop. Then, insert the hook into the loop on the hook and pull the yarn through to create another loop. You should now have two loops on the hook. Yarn over the hook and pull the yarn through both loops to complete the stitch.

Repeat this process until you have reached the end of the row. To start a new row, chain one and turn your work. Then, insert the hook into the first stitch of the previous row and continue crocheting as before.
