

# Stress Free Chicken Tractor Plans: The Ultimate Guide to Building Your Own Chicken Tractor

Are you tired of buying expensive, factory-farmed eggs? Do you want to enjoy fresh, organic eggs from your own backyard? If so, then you need to build your own chicken tractor.

A chicken tractor is a portable chicken coop that allows you to move your chickens to fresh pasture every day. This is important for their health and well-being, as it prevents them from getting bored and developing health problems. Plus, it's a great way to fertilize your lawn and garden.

Building a chicken tractor is not as difficult as you might think. With the right plans and a little bit of effort, you can build your own chicken tractor in just

a few days.

## **What is a Chicken Tractor?**

A chicken tractor is a portable chicken coop that is designed to be moved regularly. This allows you to provide your chickens with fresh pasture, which is important for their health and well-being.

Chicken tractors come in a variety of shapes and sizes. Some are small enough to be moved by hand, while others are large enough to accommodate a dozen or more chickens.

The most important thing to consider when choosing a chicken tractor is the size of your flock. You need to make sure that the tractor is large enough to accommodate all of your chickens comfortably.

## **Benefits of Using a Chicken Tractor**

There are many benefits to using a chicken tractor. Some of the most notable benefits include:

- **Improved chicken health:** Chickens that are raised on pasture are healthier than those that are raised in confinement. This is because they have access to fresh air, sunlight, and exercise.
- **Reduced feed costs:** Chickens that are raised on pasture can supplement their diet with grass and insects, which can reduce your feed costs.
- **Fertilized lawn and garden:** Chicken manure is a great fertilizer for your lawn and garden. By moving your chicken tractor regularly, you can spread their manure evenly over your property.

- **Convenience:** Chicken tractors are easy to move, which makes it easy to provide your chickens with fresh pasture. This is especially important during the summer months, when the grass is growing quickly.

## How to Build a Chicken Tractor

Building a chicken tractor is not as difficult as you might think. With the right plans and a little bit of effort, you can build your own chicken tractor in just a few days.

The first step is to gather your materials. You will need:

- Lumber (2x4s, 2x6s, and plywood)
- Hardware (nails, screws, hinges, and latches)
- Chicken wire
- Roofing material (tin, shingles, or tar paper)
- Tools (saw, drill, hammer, and screwdriver)

Once you have gathered your materials, you can begin assembling your chicken tractor. The following are the steps involved:

1. **Build the frame:** The first step is to build the frame of the chicken tractor. The frame should be made of 2x4s and 2x6s. The size of the frame will depend on the size of your flock.
2. **Attach the chicken wire:** Once the frame is built, you need to attach the chicken wire. The chicken wire should be attached to the frame with staples or nails.

3. **Add the roofing material:** The next step is to add the roofing material. The roofing material will protect the chickens from the elements.
4. **Add the door:** The last step is to add the door. The door should be large enough for you to easily access the chickens.

Building a chicken tractor is a great way to provide your chickens with fresh pasture and improve their health and well-being. With the right plans and a little bit of effort, you can build your own chicken tractor in just a few days.
